

AJC Children's Foundation

Carmen Patricia enrolled in our Girls Scholarship Program in 2012. Her mother, Lilian, supports Carmen and her own mother working at the foundation altering the clothes donations we receive for the children AHLE and also making clothes for people in the community. She has managed make sure her daughter continues with her education and achieves her dream of becoming a Civil Engineer. Carmen Patricia: "My dream is to be able to graduate from Civil Engineering, form a construction company, and contribute to the people who needs it the most. I want to help the Foundation in the way the donors, sponsors, and employees gave us a helping hand when we needed it the most.

Carmen Patricia is now on her second year of University, but things are tough financially for the family. With the support of Higher Education Program we can make sure Carmen Patricia finishes her career and joins the work force so she can help support her mother and grandmother.
